

UEA has provided service to the equine community for over 30 years. We are committed to providing superior care for our patients and excellent customer service to our clients. To accomplish this, our veterinarians focus on the horse and regularly participate in educational courses to bring you the most current care available. We believe in creating a partnership between the horse, owner and veterinarian to allow for the best possible outcome in each case. Veterinary services are offered on an ambulatory or outpatient basis depending on circumstance or preference. Our climate controlled clinic consists of a large exam area, four stalls, a reproduction center, an in house laboratory and pharmacy.

AMBULATORY SERVICE

The majority of care we provide is on the farm where the horse is stabled. In addition to providing routine care, our veterinarians make a special effort to develop a unique preventative care program for each farm. Many factors influence what may be a proper program for your farm including the number of horses, travel, competition, housing, reproductive status and age. We can provide:

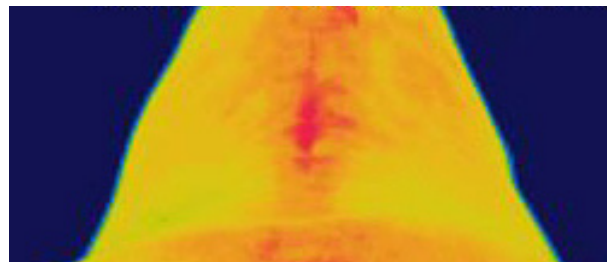

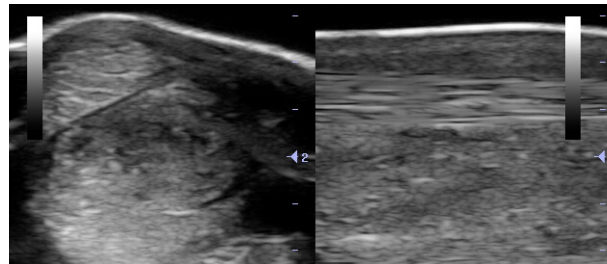

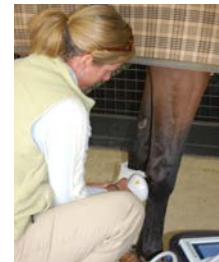

- Physical Examinations
- Immunizations
 - the finest offered on the market, some w/ manufacturer guarantees
- Targeted Deworming Protocols
- Dentistry
- Emergency service 24/7

SPORTS MEDICINE

Our veterinarians rise to the challenge of keeping our patients at peak performance. Whether it is maintenance care to stay at the top of the sport or a performance issue we are here to help. We have the most technically advanced diagnostic equipment to assist us in evaluating the equine athlete. Our available services:

- Digital Radiography
- Ultrasonography
- Lameness Locator by Equinosis
- Digital Upper Airway Endoscopy
- Digital Gastroscopy
- Regenerative Therapies
 - ~ IRAP
 - ~ ACP

PURCHASE EXAMINATIONS

Any horse that is being considered for purchase should undergo a thorough purchase examination. In addition to an assessment of the horse's history, this procedure is an exceptionally methodical medical and performance examination. We also offer the following diagnostic options to make the most informed decision in regards to a purchase.

- Complete Blood Cell Count, Fibrinogen & Chemistry
- Coggins
- Drug Test
- Fecal Egg Count
- Digital Radiography
- Upper Airway Endoscopy
- Breeding Soundness Exam
- Lameness Locator

REPRODUCTION

Our practice provides a wide variety of reproductive services. Our veterinarians are experienced with and utilize the most current methods to create a successful pregnancy. Reproductive services can be performed on the farm or at our reproduction center. Reproductive services include:

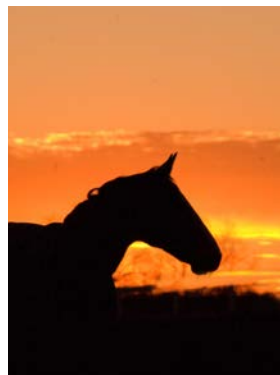

- Mare Management/Fertility Evaluations
- Artificial Insemination with cooled/fresh/ frozen semen
- Embryo Transfer
- Fertility Evaluations
- Stallion Collection
- Neonatal Care

THE FUTURE

Unionville Equine is proud to announce that we have broken ground on a new state of the art facility at our current location in Oxford, PA. Our expected completion date is Spring 2012. Visit us on Facebook or our website for the most up to date information.
